ABLOY® SENTRY

NEW PATENTED ROTATING DISC MECHANISM

The unique ABLOY detainer disc cylinder mechanism has been a symbol of high security and superior performance ever since its invention. Long lasting working life for **ABLOY® SENTRY** is based on patented improved resistance against wear and tear (AWS) -system. Because of the AWS the effect of wear to the cylinder mechanism is minimized. Its new patented functional features give more exact user experience.

The **ABLOY® SENTRY** cylinder, keys and key blanks are protected by patents world-wide until 2027.

One Key Fits All Industrial Locks

ABLOY® SENTRY locks can be keyed into the same master key system using one key profile. That means one key can open up all padlocks, camlocks and cabinet locks within the application.

Upgrading Locking Environment

ABLOY® SENTRY can be retrofitted to replace old cylinder systems. It is a very cost effective way to upgrade existing locking systems to our patented cylinder system.

Customised Solutions

If our standard product doesn't fit in into your application, it can be customised to fit your measurements.

SUPERIOR MASTER-KEYING POSSIBILITIES

The design and operating principle of disc tumbler cylinder makes it possible to create master-key systems that fulfill your precise specifications. The exceptional master-keying capabilities make **ABLOY® SENTRY** the ideal choice for applications where wide master-keying options as well as a patented cylinder system is needed.

KEY SECURITY

To guarantee maximum customer security, the **ABLOY® SENTRY** system offers several key profiles and various levels of key control to satisfy individual security requirements. Security is also optimised by the vast number of key combinations available with **ABLOY® SENTRY**. Duplication of keys is always strictly controlled. In order to get additional **ABLOY® SENTRY** keys, you must have a related keycard. These safety measures combined with ABLOY's reliable procedure makes it safe.

FUNCTIONALITY UNDER EXTREME CONDITIONS

No weather condition is too tough for the new **ABLOY® SENTRY** cylinder. Based on rotating discs, the construction is extremely resistant against dirt, freezing, salt water and wear.
