

# Cylinders

TESA

ASSA ABLOY

# Global leaders manufacturing cylinders

TESA cylinders are manufactured according to the most advanced production processes, offering an extremely secure high quality product and meeting the requirements the market demands in every different area.

TESA's range of cylinders includes a great variety of profiles in every system. TESA also offers the possibility of combining mechanical cylinders with access control systems.

## Security

Ranging from the most basic to the highest security patented, restricted-key models, our cylinders have been equipped with the most advanced protection systems: spring loaded pins, antiremoval system, etc., as befits TESA's position as the first European cylinder manufacturer. Our restricted key systems guarantee that no blank keys will be found in the market, thus ensuring protection against counterfeit keys.

## A wide range

We have classified our systems according to four standards:

- Type of key (dimple or sawn)
- Restricted key
- Degree of security
- Masterkeying capacity

The combination of such standards has created a peerless range in the market, covering every requisite in projects ranging from the residential to the institutional, from cost-efficient technical systems to high security patented systems, offering the distributor maximum profitability.

## Masterkeying capacity

All TESA systems can be master keyed. A masterkeying is a planned locking system in which the master key can open more than one cylinder, even if each cylinder has its own key. For offices, residential homes and plants of various sizes, masterkeying is the immediate solution that allows to establish an access control while reducing the number of keys that must be handled: security and comfort.

## Guaranteed by TESA

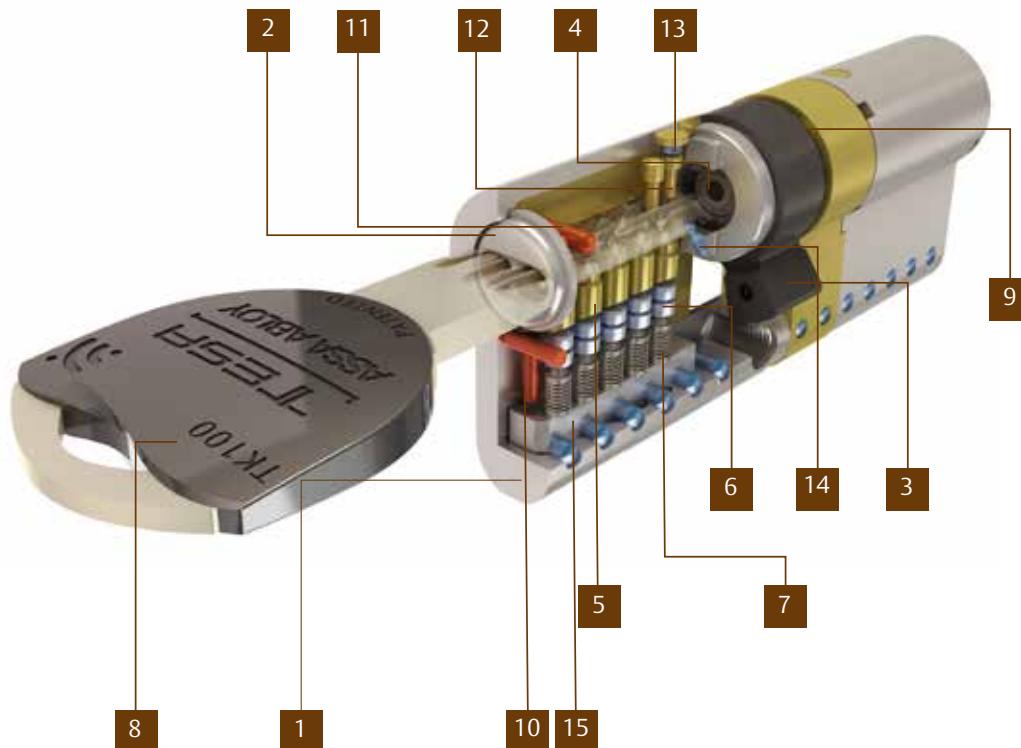

TESA meets the most demanding European standards for architectural fittings, in which cylinders are very important components in terms of protection and personal safety. Specifically, the EN 1303 European standard establishes five degrees of security (fire resistance, security against breakage, number of combinations, durability and corrosion resistance) for cylinders, based on design requisites and on practice tests simulating an attack.

The DIN standard specifies which standards must be met by cylinders in order to obtain masterkeying certifications. Other standards and certifications met by TESA's cylinders are UL (USA), NEN (Holland) and SS (Sweden).

# Introduction

- » The terminology employed in order to specify the various components that form a cylinder.
- » Selection criteria. The facts we must bear in mind when prescribing a system.
- » Systems. In this part, we will define the features of each model.
- » Profiles and models for particular applications.
- » Keyings. In which we show the most usual diagrams.

	Description
1	Barrel / Shell / Body. Frame which support the assembly.
2	Rotor / Plug. Is the part where the key is inserted to lock / unlock.
3	Cam. Translates the rotating motion of the key into sliding bolt projection.
4	Clutch. Is the component that connects one rotor, in a double cylinder, with the cam.
5	Lower pin (main row). Determines the permutation of the cylinder.
6	Upper pin (main row). Lower pin counterpart.
7	Springs. Load the pinning.
8	Key. Main accessory. Operates the cylinders.
9	Retaining clips. Fix the cylinder in a functional way.
10	Drill-proof body pin. Gives resistance against drilling and mechanical attacks
11	Drill-proof rotor pin. Gives resistance against drilling and mechanical attacks
12	Lower pin (sec.row). Same function as the main row.
13	Upper pin (sec.row). Same function as the main row.
14	Sensor. Part of the patent. Protects the cylinder against different opening methods.
15	Caps. Keep the pinning loaded

# Selection criteria

To select the most adequate model, TESA recommends having into account the following points.

- » Key type. Either sawn or dimple.
- » Security level. Determines the performance of the cylinder against different opening methods.
- » Profile. Refers to the shape of the cylinder. Depends on the type of lockset.
- » Finish. There are two options. Either brass or nickel.
- » Measurement. It will depend on the door thickness.
- » Function. Specify the way of operating with the key. From the two sides (double cylinder), only one side (single cylinder) or “one side key and thumb turn the other” (Cylinder & turn function).
- » Type of cam. It will be determined by the type lockset (for wooden doors, PVC doors...etc)
- » Format. Key different (there are no relationship between one cyl. and another), key alike (all the cylinders will be operated with the same key) and master keyed (where a hierarchy determines which keys can open particular doors).

## TX80

- » Patented dimple key with security sensor.
- » 6+2 pins in two rows.
- » Drill protection grade 2.
- » Bump proof lock.
- » Anti pick cylinder lock (High resistance.)
- » Key copies protected with security card.
- » Clutch of double security.
- » 5 key units per cylinder.
- » Conform to EN-1303 regulation.
- » Master key systems:
- » High capacity using multi-point patented pins.

Security	***
	**

Masterkeying	***
	**

## TK100

- » Patented dimple key with security sensor.
- » 5+5 multi-point pins in two rows (Exclusive TESA technology.)
- » Highest drill protection.
- » Rotor with shield integrated.
- » Advanced bump proof lock.
- » Anti pick cylinder lock (100% resistant).
- » Anti pull and anti snap features.
- » Key copies protected with security card.
- » Clutch of double security.
- » 5 key units per cylinder.
- » Conform to EN-1303 regulation.
- » Master key systems:
- » Maximum power of combination thanks to the exclusive multi-point pinning technology.

## 682 Switching lock

Cylinders designed to commute an electric circuit using a key. There are three different models.

### 682 M23 model

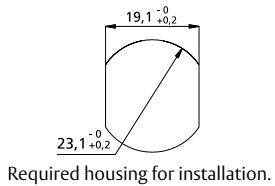

#### Options

- » 2C. Includes 2 switches commuting two circuits simultaneously.
- » 1C. One only switch activates a circuit.
- » CR. Made with one switch and automatic return..
- » 2P. Lets to extract the key in two different positions. (Only available in Tx80 range)

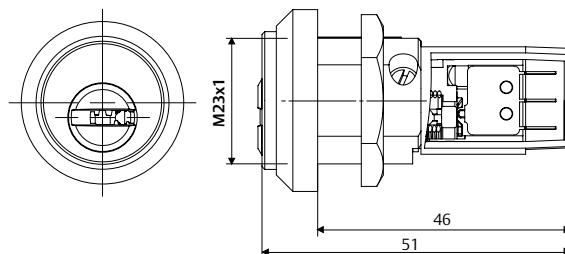

#### Applications

- » Lift, garages and automatisms in general.

**Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A**

Required housing for installation.

### 682 M27 model

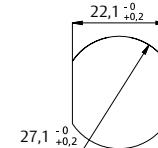

#### Options

- » 2C. Includes 2 switches commuting two circuits simultaneously.
- » 1C. One only switch activates a circuit.
- » CR. Made with one switch and automatic return.

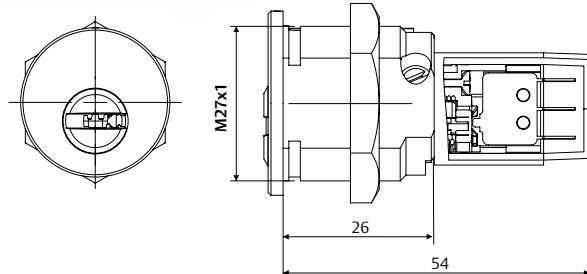

#### Applications

- » Lift, garages and automatisms.

**Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A**

Required housing for installation.

### 683 model

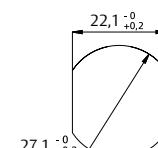

#### Options

- » 1C. One switch and a cam to activate an only circuit.
- » CR. Made with one switch and automatic return.

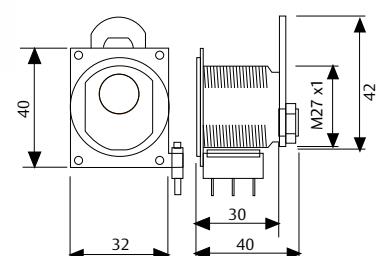

#### Applications

- » Ascensores, garajes y automatismos.

**Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A**

Required housing for installation.

# Profiles

## 682 cam locks

There are two versions available (M23 and M27) provided each with the lever shown on the technical drawing.

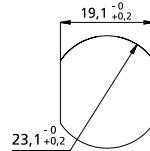

### 682 cam lock M23.

#### Options

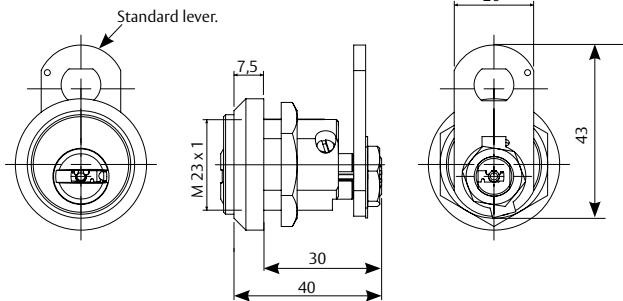

- » Different locking lever designs for different door thicknesses.

#### Applications

- » Mail boxes, Box offices...etc.

Required housing for installation.

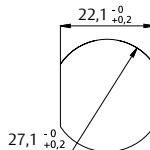

### 682 M27 cam-lock.

#### Options

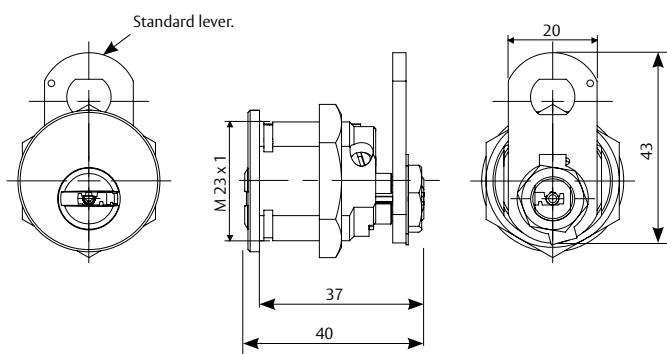

- » Different locking lever designs for a range of door thicknesses.

#### Applications

- » Safes, box offices...etc.

Required housing for installation.

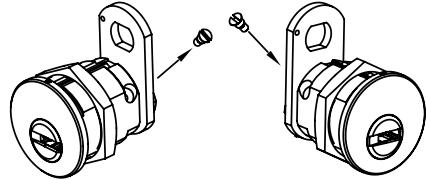

# Profiles

## 682 Cam-lock (Considerations)

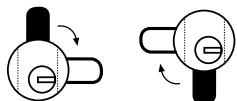

### 1. Opening type (possibilities)

This cam locks can be adapted very easily if you need to modify the standard turning. There is only to change the side where screw shown in the image is located.

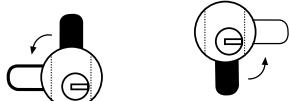

The standard lever is 43mm long and flat and can be installed either vertical or horizontally. Thanks to the double window stamped at both sides.

Turn to the right (Standard)

Turn to the left (Fixing screw changed) Vertical window.

Turn to the right.  
Horizontal window.

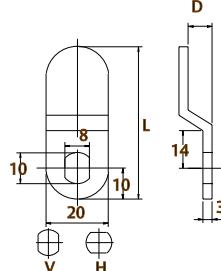

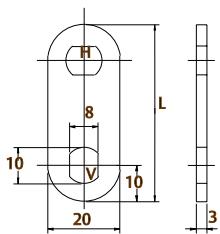

Turn to the left (Fixing screw changed) and horizontal window.

Lever black = locked / Lever white = Unlocked

### 2. Length and bent of the lever.

For those cases where a lever different to standard is needed we select the most appropriated from the list bellow.

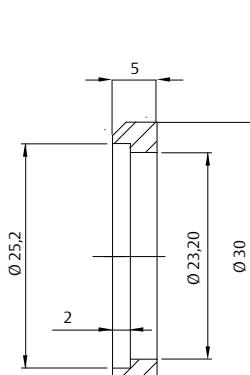

Lenght	Window	Product code
37	V + H	LEVA37VH
40	V + H	LEVA40VH
43	V + H	LEVA43VH
46	V+H	LEVA46VH

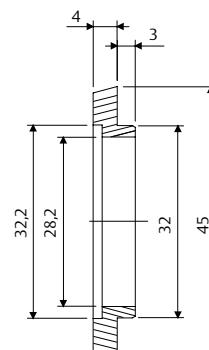

Minimum order qty. 5

### 3. Ring shields.

Useful when the length of cylinder is too much. There is one model for each shell dimension (M23 & M27)

ESCUM23MN2  
(For cylinders M23)

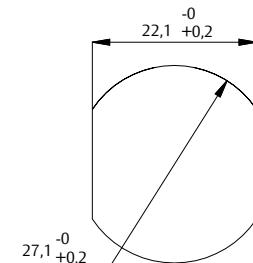

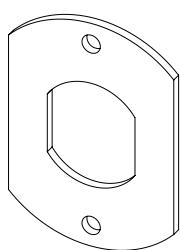

ESCEXTREG  
(For cylinders M27)

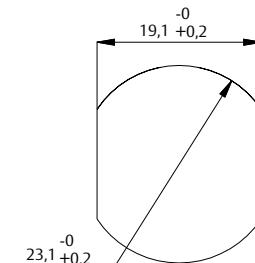

### 4. Anti-turn plate.

Scope of delivery: 5 units.

Their mission is to avoid turning the cylinder while the user is operating with the key.

Anti-turn M27 technical  
measures of the hole

Anti-turn M23 technical  
measures of the hole

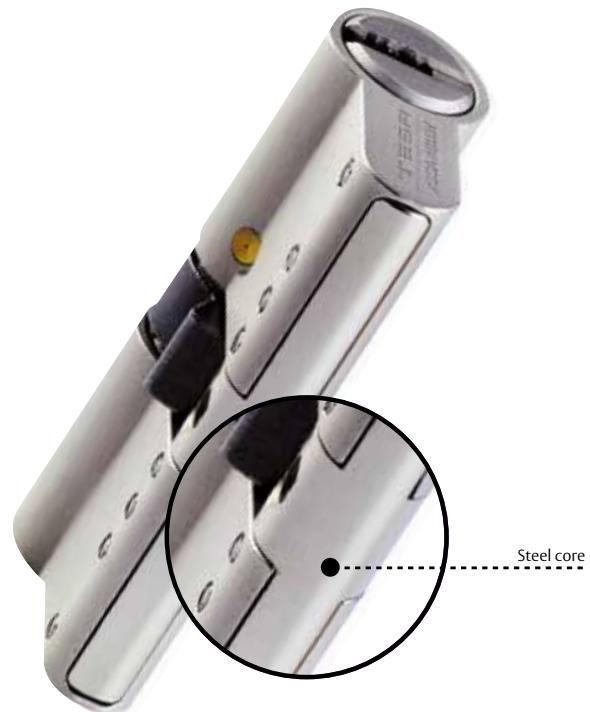

# Profiles

## Modularity

New version in European profile thought to complete the range of measurements that are not available with the regular part numbers.

In addition to that, the modular version strengthens the core of the shell thanks to the union bar used which is made of steel.

To transfer an order using the corresponding part numbers (see the chapter T60, T80 and TX80) the specific dimension for side A-B will be required. The cam only if it is not R15 (DIN version).

## Cases and system heads.

Solution developed to assemble unusual measurements in a quick and simple way.

### Advantages:

- » Snap resistance. With these assemblies you will increase this level.
- » Express deliveries. Cylinders can be assembled in the hardware store.
- » To assemble every cylinder format (double, single, knob...) or measurement, TESA recommends both kits and the heads (available from T60).

**Modular kit.**  
Includes all the parts related with the modular assembling.

**Spare part kit.**  
Contains all the regular components used in general with the different cylinder profiles.

# Standard cylinder TE5

## Technical data

TE5 covers the basic segment of the range. Entirely manufactured and assembled in Spain is the most balanced solution for regular and master keyed installations.

D

### Characteristics

- » Type: Sawn key. (Steel nickel plated).
- » NO. of rows: 1
- » NO. of pins: 5
- » Technology: Tumbler regular.
- » Permutation level: Grade 5.
- » Corrosion resistance: Grade B.
- » Pick protection: Medium level.
- » Lifespan: 50,000 test cycles.
- » 3 keys per cylinder.
- » Conform to EN-1303 regulation.

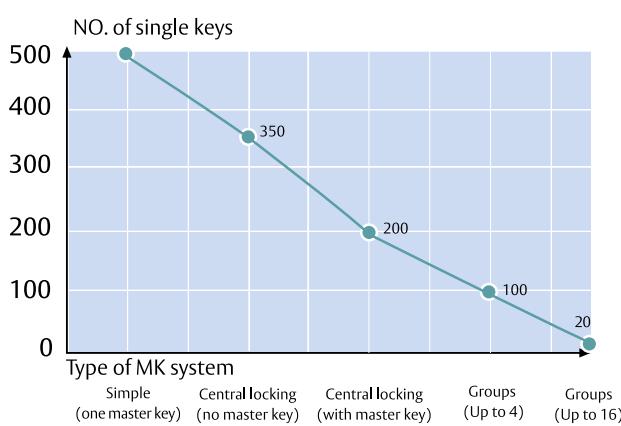

### Options

- » Finishes: Brass / Nickel plated.
- » Cam: DIN R15 and R13
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.

### Master key systems.

The platform which supports its manufacturing lets combine 10 heights per position. Thanks to that, the TE5 can face master key systems with total working guarantee.

Capability graph (Average quantities)

### European standard regulation

In the same way as the main models included in the catalogue, TE5 is certified according to the European standard regulation.

1	5	0	1	0	B	2	0
Key resistance (Grade 0-1)	Lifespan (Grade 0-6)	Door mass (Not applied in cylinder)	Fire resistance (Grade 0-1)	Safety of the people (Not applied in cylinders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0 to 2)

### Recommendations

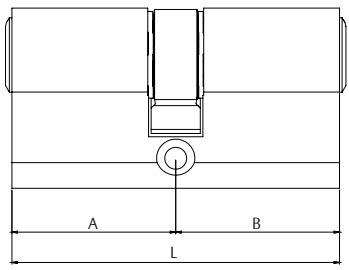

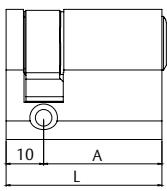

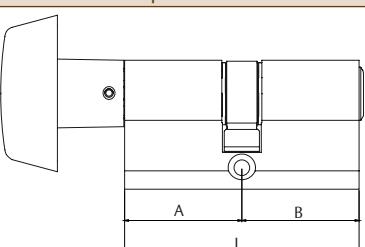

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

# Standard cylinder TE6

## Technical data

A cylinder designed to solve medium complexity master key suits. In addition, it includes a higher level of passive protections. Such us anti drill pins, bump proof pinning...etc.

Security **	Masterkeying ** *
----------------	-------------------------

! Only available for masterkeying

### Characteristics

- » Type: Sawn key. (Brass nickel plated).
- » NO. of rows: 1
- » NO. of pins: 6
- » Technology: Tumbler regular.
- » Permutation level: Grade 6.
- » Corrosion resistance: Grade B.
- » Pick protection: Medium level.
- » Drill resistant.
- » Bump proof cylinder lock.
- » Lifespan: 50,000 test cycles.
- » 3 keys per cylinder.

### Options

- » Finishes: Brass / Nickel plated.
- » Cam: DIN R15 and R13
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.

### Master key systems.

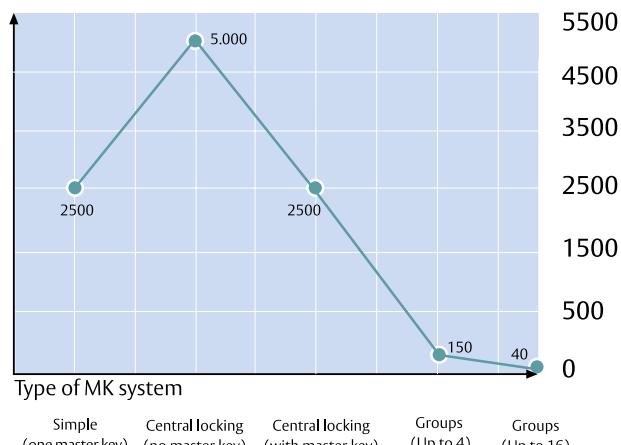

In addition to combine 10 heights per position this model has the possibility of using 3 different key profiles.

### Recommendations

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you select a new cylinder, remember that once installed, it should not project more than 1mm.

# Security cylinder T60

## Technical data

It is a reversible dimple key system which covers basic security levels.

Security **	Masterkeying *
----------------	-------------------

### Characteristics

- » Type: Dimple key. (Brass nickel plated).
- » NO. of rows: 1
- » NO. of pins: 6
- » Combination level: Grade 5
- » Technology: Tumbler regular.
- » Corrosion resistance: Grade B.
- » Anti pick system.
- » Drill resistant.
- » Bump proof cylinder lock.
- » Lifespan: 100,000 test cycles.
- » 3 / 5 keys per cylinder.
- » Conform to EN-1303 regulation

### European standard regulation.

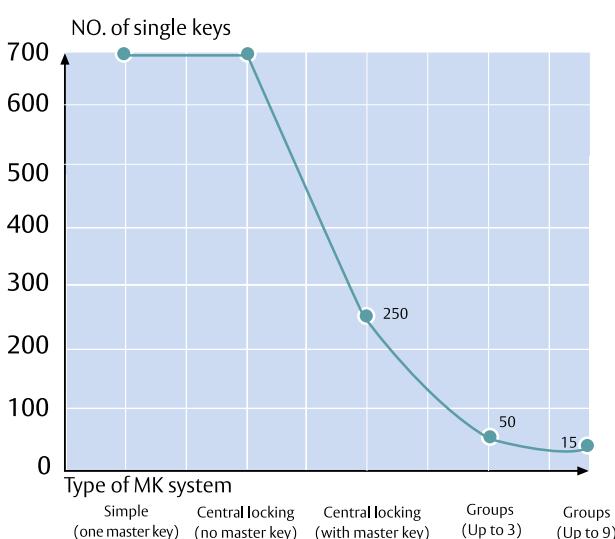

T60 is certified according to the standard EN 1303 regulation, getting the following results.

1	6	0	1	0	B	5	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinder)	Fire resistance (Grade 0-1)	Safety of the people (Not applied in cylinders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0 to 2)

\*Note; with the shield E700 the attack resistance rise to the level 2.

### Master key systems.

Appropriated model for those master key suites where the levels of complexity are not too high.

### Recommendations

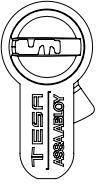

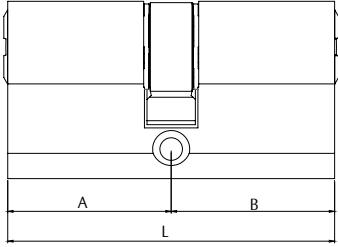

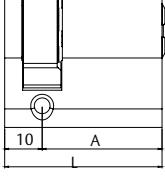

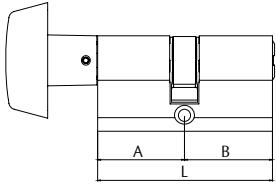

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you select a new cylinder, remember that once installed, it should not project more than 1mm.

## Technical data

Reversible dimple key with open key blank distribution.

D

### Characteristics

- » Type: Dimple key. (Nickel silver).
- » NO. of rows: 2
- » NO. of pins: 8
- » Combination level: Grade 6
- » Technology: Tumbler regular.
- » Corrosion resistance: Grade B.
- » Anti pick cylinder lock
- » Drill resistant.
- » Bump proof model.
- » Lifespan: 100,000 test cycles.
- » 3 / 5 keys per cylinder.
- » Conform to EN-1303 regulation

### Options

- » Double security clutch.
- » Modular. (Specially designed for either unusual measurements or anti snap protection)
- » Cams: DIN R15, R13.
- » Finishes: Brass / Nickel.
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.

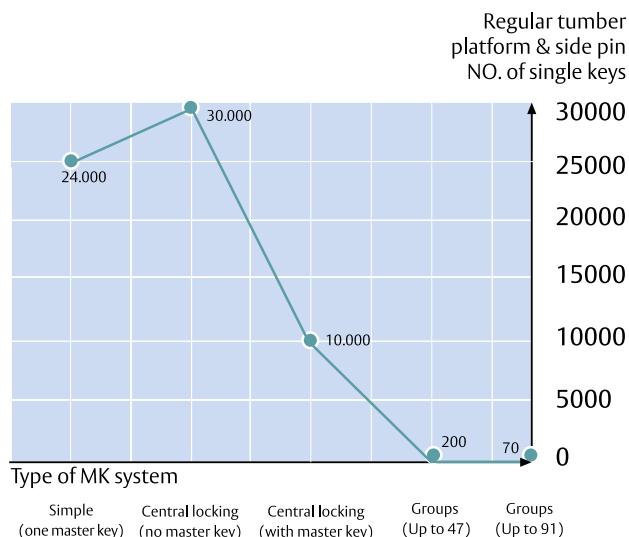

### Recommendations

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you select a new cylinder, remember that once installed, it should not project more than 1mm.

### Master key systems

The eight position chambers and the possibility of varying side pins makes T80 the most suitable option for those master key systems where the number of key functions is large and the copy control is not required.

## Technical data

New model designed to cover two basic necessities in the market. On the one hand has been made with an exclusive and patented combination technology to solve complex master key suites and on the other hand a new security sensor lets the owner control all the keys in one installation.

Security	***
	**

Masterkeying	**
	**

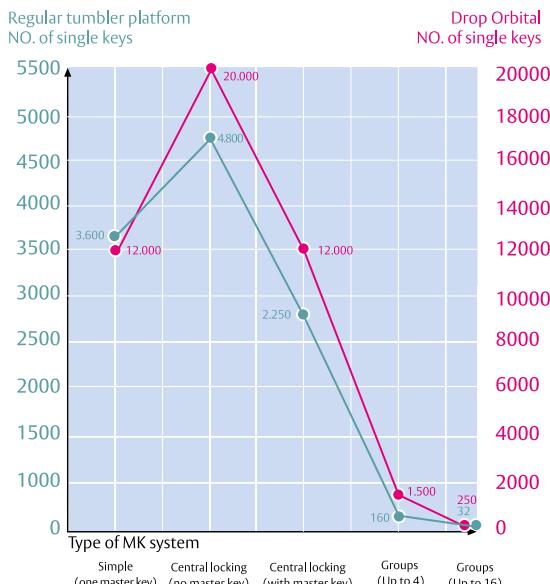

## Characteristics

- » Type: Patented sawn key with security sensor.
- » NO. of rows: 1
- » NO. of pins: 6.
- » Technology: DROP ORBITAL (Exclusive TESA rights)
- » Permutation level: Grade 6.
- » Corrosion resistance: Grade B
- » Anti pick cylinder lock (High resistance.)
- » Bump proof system.
- » Drill protection grade 1.
- » 3 patented keys made of nickel silver.
- » Conform to EN-1303 regulation.
- » Lifespan: 100,000 test cycles.
- » Master key systems: Medium capability in combination with DROP ORBITAL platform.

## Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.
- » Colour points to differentiate master key levels.

## Master key system

## European standard regulation

In the same way as the main models included in the catalogue, the TK6 is certified according to the European standard regulation.

1	6	0	1	0	B	6	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinder)	Fire resistance (Grade 0-1)	Safety of the people (Not applied in cylinders)	Corrosion and temperature resistance (Grade D-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0 to 2)

\*Note: with the shield E700 the attack resistance rise to the level 2.

## Recommendations

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA recommends to the user of the TK6 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

# High security cylinder TX80

## Technical data

Tx80 cylinders have been designed according to the highest quality protection systems. It is a model in constant evolution that incorporates the most advanced security developments (bumping, picking...etc). A design thought to offer to the user the higher security grade in all its extension.

Security	***
Masterkeying	*** **

## Characteristics

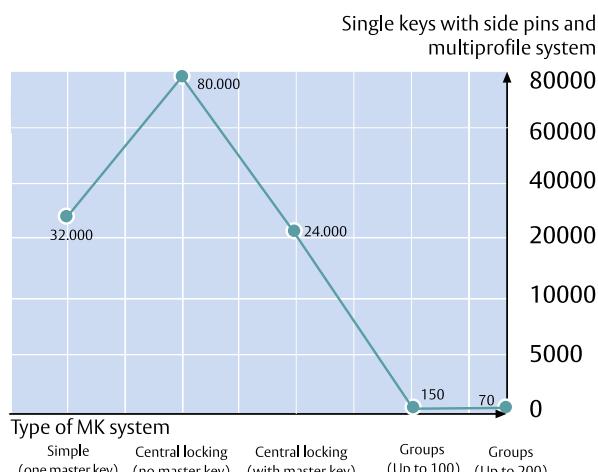

- » Type: Patented dimple key with security sensor.
- » NO. of rows: 2
- » NO. of pins: 8
- » Technology: Tumbler regular.
- » Permutation level: Grade 6.
- » Corrosion resistance: Grade B
- » Anti pick cylinder lock (High resistance.)
- » Bump proof system.
- » Drill protection grade 2.
- » Lifespan: 100,000 test cycles.
- » Key copies protected with security card.
- » Clutch of double security.
- » 5 patented keys made of nickel silver.
- » Conform to EN-1303 regulation.
- » Master key systems: High capability using side pins and multi profile key ways.

## Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13.
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.
- » Colour points to differentiate master key levels.

## Master key systems

The patented character of the system will let the owner control, in every moment, the key copies thanks to the property card provided with each cylinder or master key suite.

## European standard regulation

In the same way as the main models included in the catalogue, TX80 is certified according to the European standard regulation.

1	6	0	1	0	B	6	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinder)	Fire resistance (Grade 0-1)	Safety of the people (Not applied in cylinders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0 to 2)

\*Note; with the shield E700 the attack resistance rise to the level 2.

## Recommendations

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA recommends to the user of the TX80 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

These cylinders are provided with 4 owner keys and one for the assistant.

Both side A and B includes the function.

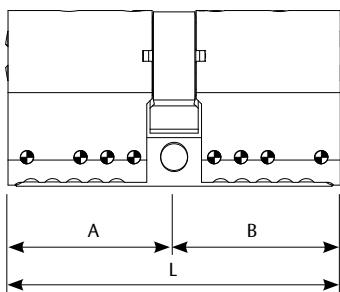

\* To process "master keyed" and "cylinders alike" orders add either AM or KA in each part number, respectively.

\*\* The butler system lets operate with the key from the outside even if knob is blocked. Is a solution thought for schools, geriatrics.. etc.

# High security cylinder TK100

## Technical data

TK100 cylinders have been designed with the most exclusive protection systems. This newly version integrates, in addition of the patent, an exclusive orbit combination system which fully surpass the maximum key security grade specified in the standard regulation. In addition to that, this new manufacturing concept improves against non destructive opening methods such us bumping, picking...etc. To complete the maximum security grade in all its extension, this model incorporates extra protections to resist the most usual attacks applied when breaking in. In terms of drill protections, TK100, in addition of incorporating hardened pins, includes a new protector shield integrated. With this new cylinder, TESA starts a new gait which lead the future in all the cylinder range.

Seguridad	Amaestramiento
****	****

D

## Characteristics:

- » Type: Patented dimple key with security sensor.
- » NO. of rows: 2
- » NO. of pins: 10 + 2 integrated in the key.
- » Technology: DROP ORBITAL (TESA exclusive)
- » Permutation level: Widely surpass the Grade 6 specified in the standard regulation.
- » Corrosion resistance: Grade C
- » Anti pick cylinder lock (Highest resistance.)
- » Advanced bump proof system.
- » Drill protection higher than grade 2.
- » Anti pull and anti snap features.
- » Lifespan: 200,000 test cycles.
- » Key copies protected with security card.
- » Clutch of double security.
- » Conform to EN-1303 regulation.
- » 5 patented keys made of nickel silver.
- » New ergonomic key design.

## Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13.
- » Formats available: Key different, master keyed, key alike and specific codes.
- » Wide measurement and profile range.
- » Colour points to differentiate master key levels.

## Master key systems.

The new orbit permutation system TESA has patented gives TK100 the highest level of security ever seen in the market. For that reason, TK100 is the ideal system for master keyed requirements. It does not matter how complex the master keying is. TK100 will solve, widely, every type of lock charts.

## European standard regulation

TK100 widely surpass the different laboratory tests specified in the standard European regulation.

1	6	0	1	0	C	6	2
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinder)	Fire resistance (Grade 0-1)	Safety of the people (Not applied in cylinders)	Corrosion and temperature resistance (Grade D-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0 to 2)

## Recommendations.

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA recommends to the user of the TK100 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

# Master key systems

A master key system is a planned locking system where a master key can open more than one cylinder, even if each cylinder has its own key. For offices, residential homes and blocks of various floors, the master key system is the immediate solution that allows to establish an access control while reducing the number of keys that must be handled: security and comfort.

# Master key systems

## Surcharges for cylinders master keyed

Orders for master key systems will be surcharged according to the Product codes described in the tables.

Every type of locking system, both master keyed and cylinders alike, is codified according to the list shown bellow.

Product code	
A	Key alike
B	Specific key coding
C	Central locking system (Community type)
D	Central locking system with GMK
E	Central locking system with several levels. (Apartment block type)
F	Simple master key system
G	Group master key system
H + I	Complex master key suites. (Side pin)
K	Construction key

Note: Master key suites over 200 key functions can be charged with the type H - I. It will depend on the cylinder model selected.

## How to build surcharges for master keyed cylinders.

Product code			
Type	System	Code	Code description
REC1	TE5	A	Key alike.
		B	Specific key coding.
	TK6	C	Central locking system (Community type).
		D	Central locking system with GMK.
	T80	E	Central locking system with several levels. (Apartment block type).
		F	Simple master key system.
	TX8	G	Group master key system.
		H	Complex master key suites. (Side pin)
	T10	I	Others more complicated. (Side pin and multi profile).
		K	Construction key.

Example for a TK100 keyed alike. REC2TK1A.

## TESA **48 HOURS** service

With this service, your orders will be manufactured in 48 hours. Always according to TESA's calendar and considering that has been processed within the range specified latter on. In addition, the order has to specify the term "express 48h delivery".

### Working conditions:

1. Maximum order quantity: 100 units
2. Daily time limit: 11.00 am GMT 1:00. Orders received later will be postponed one day.
3. 48 hour orders can not be cancelled.
4. The orders must be specified in a lock chart made on excel or similar application.

### 48h Range

1. Systems: TE5, TK6, T60, T80 and TX80.

2. Finishes: Brass and Nickel

3. European profile measurements (Cam of 15mm).

- **TE5:** - Double and thumb turn; from 30x30 to 50x50 and rising in 5mm.
  - Single from 30 to 50x10mm and 30Rx10 (Adjustable tail).
- **TK6, T60, T80 and Tx80:** - Double and thumb turn; from 30x30 to 40x40.
  - Single from 30x10, 35x10 and 40x10mm.
  - Round cylinders: TK6, T60, T80 and Tx80:
  - 682 M23 and M27 switch and lever cam.

4. How to build 48 hour surcharges:

Product code			Description
Type	System	Code	
REC248	TE5	A	Key alike
		B	Specific key coding
		C	Central locking system (Community type)
	T60	D	Central locking system with GMK
	T80	E	Central locking system with several levels. (Apartment block type)
	TX80	F	Simple master key system
		G	Group master key system

Note; Cam R13mm (narrow style lock sets) can be asked for:

TE5, T60 and T80 within the range 30x30, 30x40, 35x35, 30x10 30x50, 40x40, 30Bx30. Nickel-plated.

TX80 within the range 30x30, 30x40, 35x35 and 30Bx30. Nickel-plated.

## Knob sets master keyed in **72 HOURS**

In addition of 48 hour service, TESA gives you the possibility of having knob sets master keyed in 72 hours. The process is exactly the same but using the range specified in the table.

Range			
Range of knob sets	Finish	System	Type
3500, 3502, 3510, 3512	LP - CM - LM	TE5 - T60 - T80	Key alike.
3900, 3902, 3910, 3912	LP - CM - LM	TE5 - T60 - T80	Specific key coding
3B00, 3B02, 3B10, 3B12	LP - CM - LM	TE5 - T60 - T80	Central locking system (Community type).
			Central locking system with GMK.
			Central locking system with several levels. (Apartment block type).
			Simple master key system.
			Group master key system.

Example to get a part number built for a knob set 3,500 (back set 70mm) and T80 cylinder master keyed (simple) made of brass polished. 35007ALP + REC248T80F.

# Accessories and cylinder parts

## Key blanks

System	Material	Product code
TE5	Steel	LLAVTE5HH
TE5	Brass nickel plated	LLAVTE5LT
T60	Brass nickel plated	LLAVBRT60NS
T80	Nickel silver.	LLAVBRT80
T10	Nickel silver.	LLAVBRT1

## Cut keys

System	Material	Cut key part	Supplementary keys in a locking plan or cylinders keyed alike
Borja	Steel	LLAVD2 1D, 1I, 2D, 2I, 3D, 3I, 4D, 4I, 5D, 5I	LLAVSUBJ
TE5	Steel	LLAVD3HH	LLAVSUH
TE5	Brass nickel plated	LLAVD3LT	LLAVSUAL
T60	Brass nickel plated	LLART60	LLAVSUT60
T80	Nickel silver	LLART80	LLAVSUT80
TX80	Nickel silver	LLARTX80	LLAVSUTX8
T10	Nickel silver	LLART10	LLAVSUT10
TK100	Nickel silver	LLARTK100	LLAVSUTK100

## Combi RFID keys

The RFID COMBI key from TESA allows mechanical master key systems to be compatible with TESA Standalone or other access control systems in only one device or credential.

COMBI key can be compatible with mechanical T80, TX80 or TK100 cylinders, furthermore, user will also have access to RFID MIFARE technology electronic lock or wall readers simply approaching the key head.

System	Product code (cut key)	Product code (blank key)
T80	LLAT80TALLCOMBI	LLAVBRT80COMBI
TX80	LLATX8TALLCOMBI	
TK100	LLATK1TALLCOMBI	

\*Only for TK100 Version 1.

# Accessories and cylinder parts

## Modularity

### Modular cases.

Both cases and the primary modules will let you assemble every measurement and format (double cylinder, single and thumb turn) in a very short time. Moreover, with this version and thanks to the union bars, these assemblies strengthen the snap resistance.

## Pinion gears

Product code	Description
	EXCZ10D24 50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from both tooth and bottom land.
	EXCZ10D24V 50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from the bottom land.
	EXCZ10D24D 50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from the tooth.
	EXCZ13D30KSO 50 pinion gears with 13 teeth. Outside diameter is 30 mm and thickness, 4mm. Compatible with gears from the bottom land.

# Accessories and cylinder parts

## Key switch electric boxes

686 / 687

### Options

- » 1M: 1 microswitch
- » 1L: 1 micro + luminous indicator.
- » 2M: 2 microswitches.
- » 2L: 2 micro+luminous indicator.
  
- » 1ME: 1 micro with interlocking.
- » 1LE: 1 micro + light + interlocking.
- » 2ME: 2 micro+interlocking.
- » 2LE: 2 micro + light + interlocking
  
- » Microswitch: maximum voltage 220 Vac. Maximum intensity 5A.
- » ED Red/Green: maximum voltage 12 Vac.

### Model with interlocking

- » When turning the key, it will activate the microswitch and remain fixed.

### Model with return

- » Once the key is turning, it activates the microswitch and, later, a spring will prompt the return for removing the key.

### Model with emergency stop (686sc2leseta)

- » Unlocking of emergency exits blocked by electromagnetic locks.
- » Press button available instead of "mushroom".
- » Mortise model available.

### Model with activation button (686sc2meboton)

- » For opening electrically controlled doors (except electromagnetic)
- » Mortise model available.

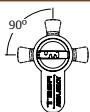

Option	686 with return	686 interlock.
1M	686 SC 1M 220	686 SC 1ME 220
1L	686 SC 1L 220	686 SC 1LE 220
2M	686 SC 2M 220	686 SC 2ME 220
2L	686 SC 2L 220	686 SC 2LE 220

Modelo	687 with return	687 interlock.
1ME	687 SC 1M 220	687 SC 1ME 220
1LE	687 SC 1L 220	687 SC 1LE 220

	T60	T65W 30 10 N		
	T80	T85W 30 10 N	TX80	TX8W 30 10 N

# Accessories and cylinder parts

## Disconnectors with interlock switch

There are two applications available only by changing the position of the cylinder cam.

### 1. Cam 90° to the left.

They can be used as energy saving devices in hotel rooms, for example.  
The key used to unlock the door of the room will have to remain inserted and turned in the box if the guest wants to use the air conditioned, lights, heating...etc.  
This system ensures the electric consumption to the time spent by the guest in the room.  
existentes de TESA.

### 2. Cam to 25° to the left.

Connection and disconnection with key withdrawal in both positions.

#### Applications:

Installations working by day (the switch closes the circuit) and disconnected by nights (circuit open).

## Key switch box with emergency mushroom

It includes a protector to avoid pushing the mushroom by accident.

When the mushroom is pushed, it breaks the circuit and remains interlocked. To revoke the operation, there has to turn it to the left.

#### Application:

1. Installations provided with electromechanical lock sets.
2. Opening of emergency doors controlled electronically.

Model	686	687
1 Mushroom + 2 switches + 2 led	686SC2LE220SETA	687SC2LE220SETA

Microswitch: maximum voltage 220 Vac. Maximum intensity 5A.

LED Red/Green: maximum voltage 12 Vac.

# Accessories and cylinder parts

## Key switch box with emergency push button

The circuit is opened while someone keeps the STOP button pushed.

**Applications:** Escalators, automatic doors...etc.

Available models 686 and 687. Optional with two led (red and green).

Model	686	687
STOP with two switches	686SC2MESTOP	687SC2MESTOP
STOP with two switches and 2 led.	686SC2LESTOP	687SC2LESTOP

Microswitch: maximum voltage 220 Vac. Maximum intensity 5A.

LED Red/Green: maximum voltage 12 Vac.

The cylinder is not included (Order separately).

## Key switch box with activation button

When the button is pushed the circuit is activated

Button: It is a push button switch normally open.

**Applications:** Electromechanical unlocking...etc.

Model	686	687
Activator with two switches.	686SC2MESTOP	687SC2MESTOP
Activator with two switches and 2 led.	686SC2LESTOP	687SC2LESTOP

Microswitch: maximum voltage 220 Vac. Maximum intensity 5A.

LED Red/Green: maximum voltage 12 Vac.

The cylinder is not included (Order separately).

## Adjustable cam single cylinder for electrical boxes.

» Cylinders compatible with the boxes.

These boxes require a cylinder 30x10 with the cam placed 90° to the left. Except in the option 1ME with key withdrawal in both positions, where the cam must be placed to 25°.

Single EURO	Sys.	Product code	Sys.	Product code
	TE5	T53W 30 10 N		T10PW 30 10 N
	T60	T65W 30 10 N		
	T80	T85W 30 10 N	TX80	TX8W 30 10 N
			TK100	TKC53010N

\*The cylinder is not included (Order separately).

# Accessories and cylinder parts

## KEY DEPOSIT

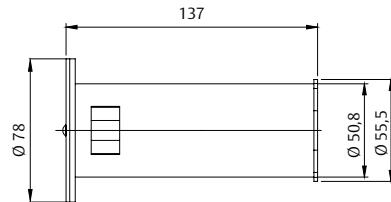

Designed to keep in a safe place particular keys that may be required at specific times.

### Available models

- » Key deposit with plate protection and outdoor use.
- » Key deposit with plate protection and security microswitch. When this deposit is open and properly installed, it sends a warning signal reporting the opening in a central alarm, police panel...etc.

### Professional applications of the key deposit

- » Telecommunications, electric or water companies.
- » Firemen and security companies.
- » Banks, offices, shops.

The cylinder is not included. Order apart.

## TESA maintenance spray

A product specially developed to maintain the correct working of the cylinder lock.

### Product description:

- » It cleans and lubricates the cylinder.
- » It protects the cylinder from the corrosion and rust.
- » Appropriate between -40° and 600°C
- » Content of each can: 50ml

Product code	Description
SPRAYTESA	12 spray cans per unit box

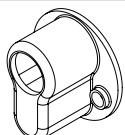

12units

## Shield protective

Product code	Description
ESCUUNIVEURO1	(universal shield protective)

Minimum order quantity 25 units
